

VOLCANO

ILE De La Réunion

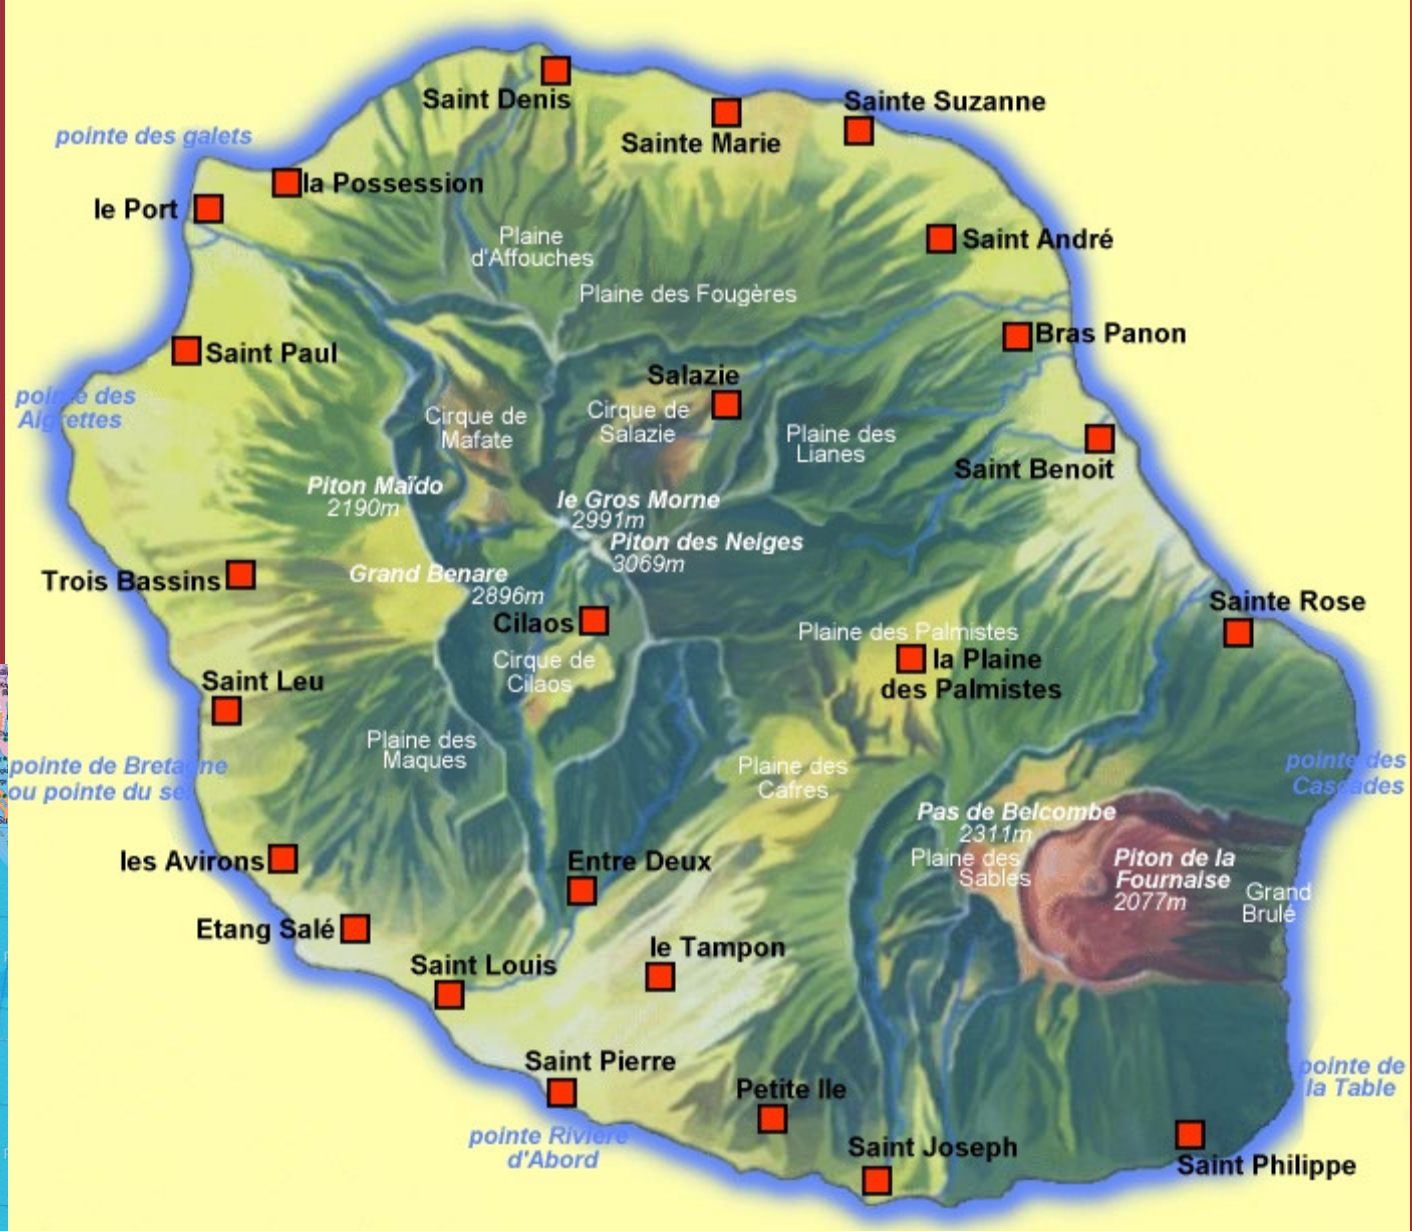

The volcano of Reunion Island is the 2nd tallest volcano in activitie of the world (the 1st is Hawaii). If you are lucky, you can see the volcano erupting. It is an effusive volcano. There is a guesthouse there.

There are also little volcanoes inside (the » piton la fourmi »...). There are tunnels of lava ; and we also can do a helicopter tour over the craters.

THE VOLCANO IS ON FIRE !

Reunion Island is in the Indian ocean, in the archipelago of Mascareignes, and the nearest countries are Madagascar and Mauritius.

The volcano of Reunion island is in the Enclos in the south east of the island.
