

Stogie T

His real name is Tumi Molekane. He was born on 16th August in 1981 in Tanzania (he is 41 years old). He lives in Soweto (South Africa). He's really good when he sings because his lyrics are so moving. He's sociable because we were able to talk to him at the end of his concert.

The coolest concert !

The show was dynamic because spectators danced and sang.

- The musicians/ the backing singers :

- Shane Cooper:musical director, bassist, guitarist

- Bonj : backing singer

- Bokani Dyer: keyboard player, backing singer

- Clem Carr: samplist, keyboard player

- Justin Badenhorst : drummer

- The concert was in Kerveguen on February the 2nd in the afternoon.

- I liked when everybody sang because it was much fun.

- The spectators were students from different high schools: Terre Sainte, Ravine des Cabris and Plateau Goyaves.

- It was really cool because I love concerts even if American rap is my type of music, I discovered South African rap with Stogie T.
