## SIMON LUCAS SECONDARY SCHOOL

### THE KITCHEN GARDEN

Monday, November 23th 2020

The kitchen garden is behind the school.

They began the kitchen garden in 2019 with only chilis and they planted new vegetables in August 2020.

Some teachers made a donation and gave some vegetables to the project.

The vegetables are in the sun and the fence is made of bamboo.

On Monday and Tuesday, one half of the class takes care of the vegetables. The vegetables are watered everyday.

They planted corn, lettuce, « brèdes », green beans, papaya, tomatoes, carrots, pumpkin, basil, mint, cabbage, manioc and bananas.

They sell them to the school staff and to the teachers.

There is a composter in the kitchen garden. It is composed of leaves which come from the playground and the leftovers from the cafeteria.

They use them as fertilizer for the vegetables.
