Reunion island

Presentation

Reunion island

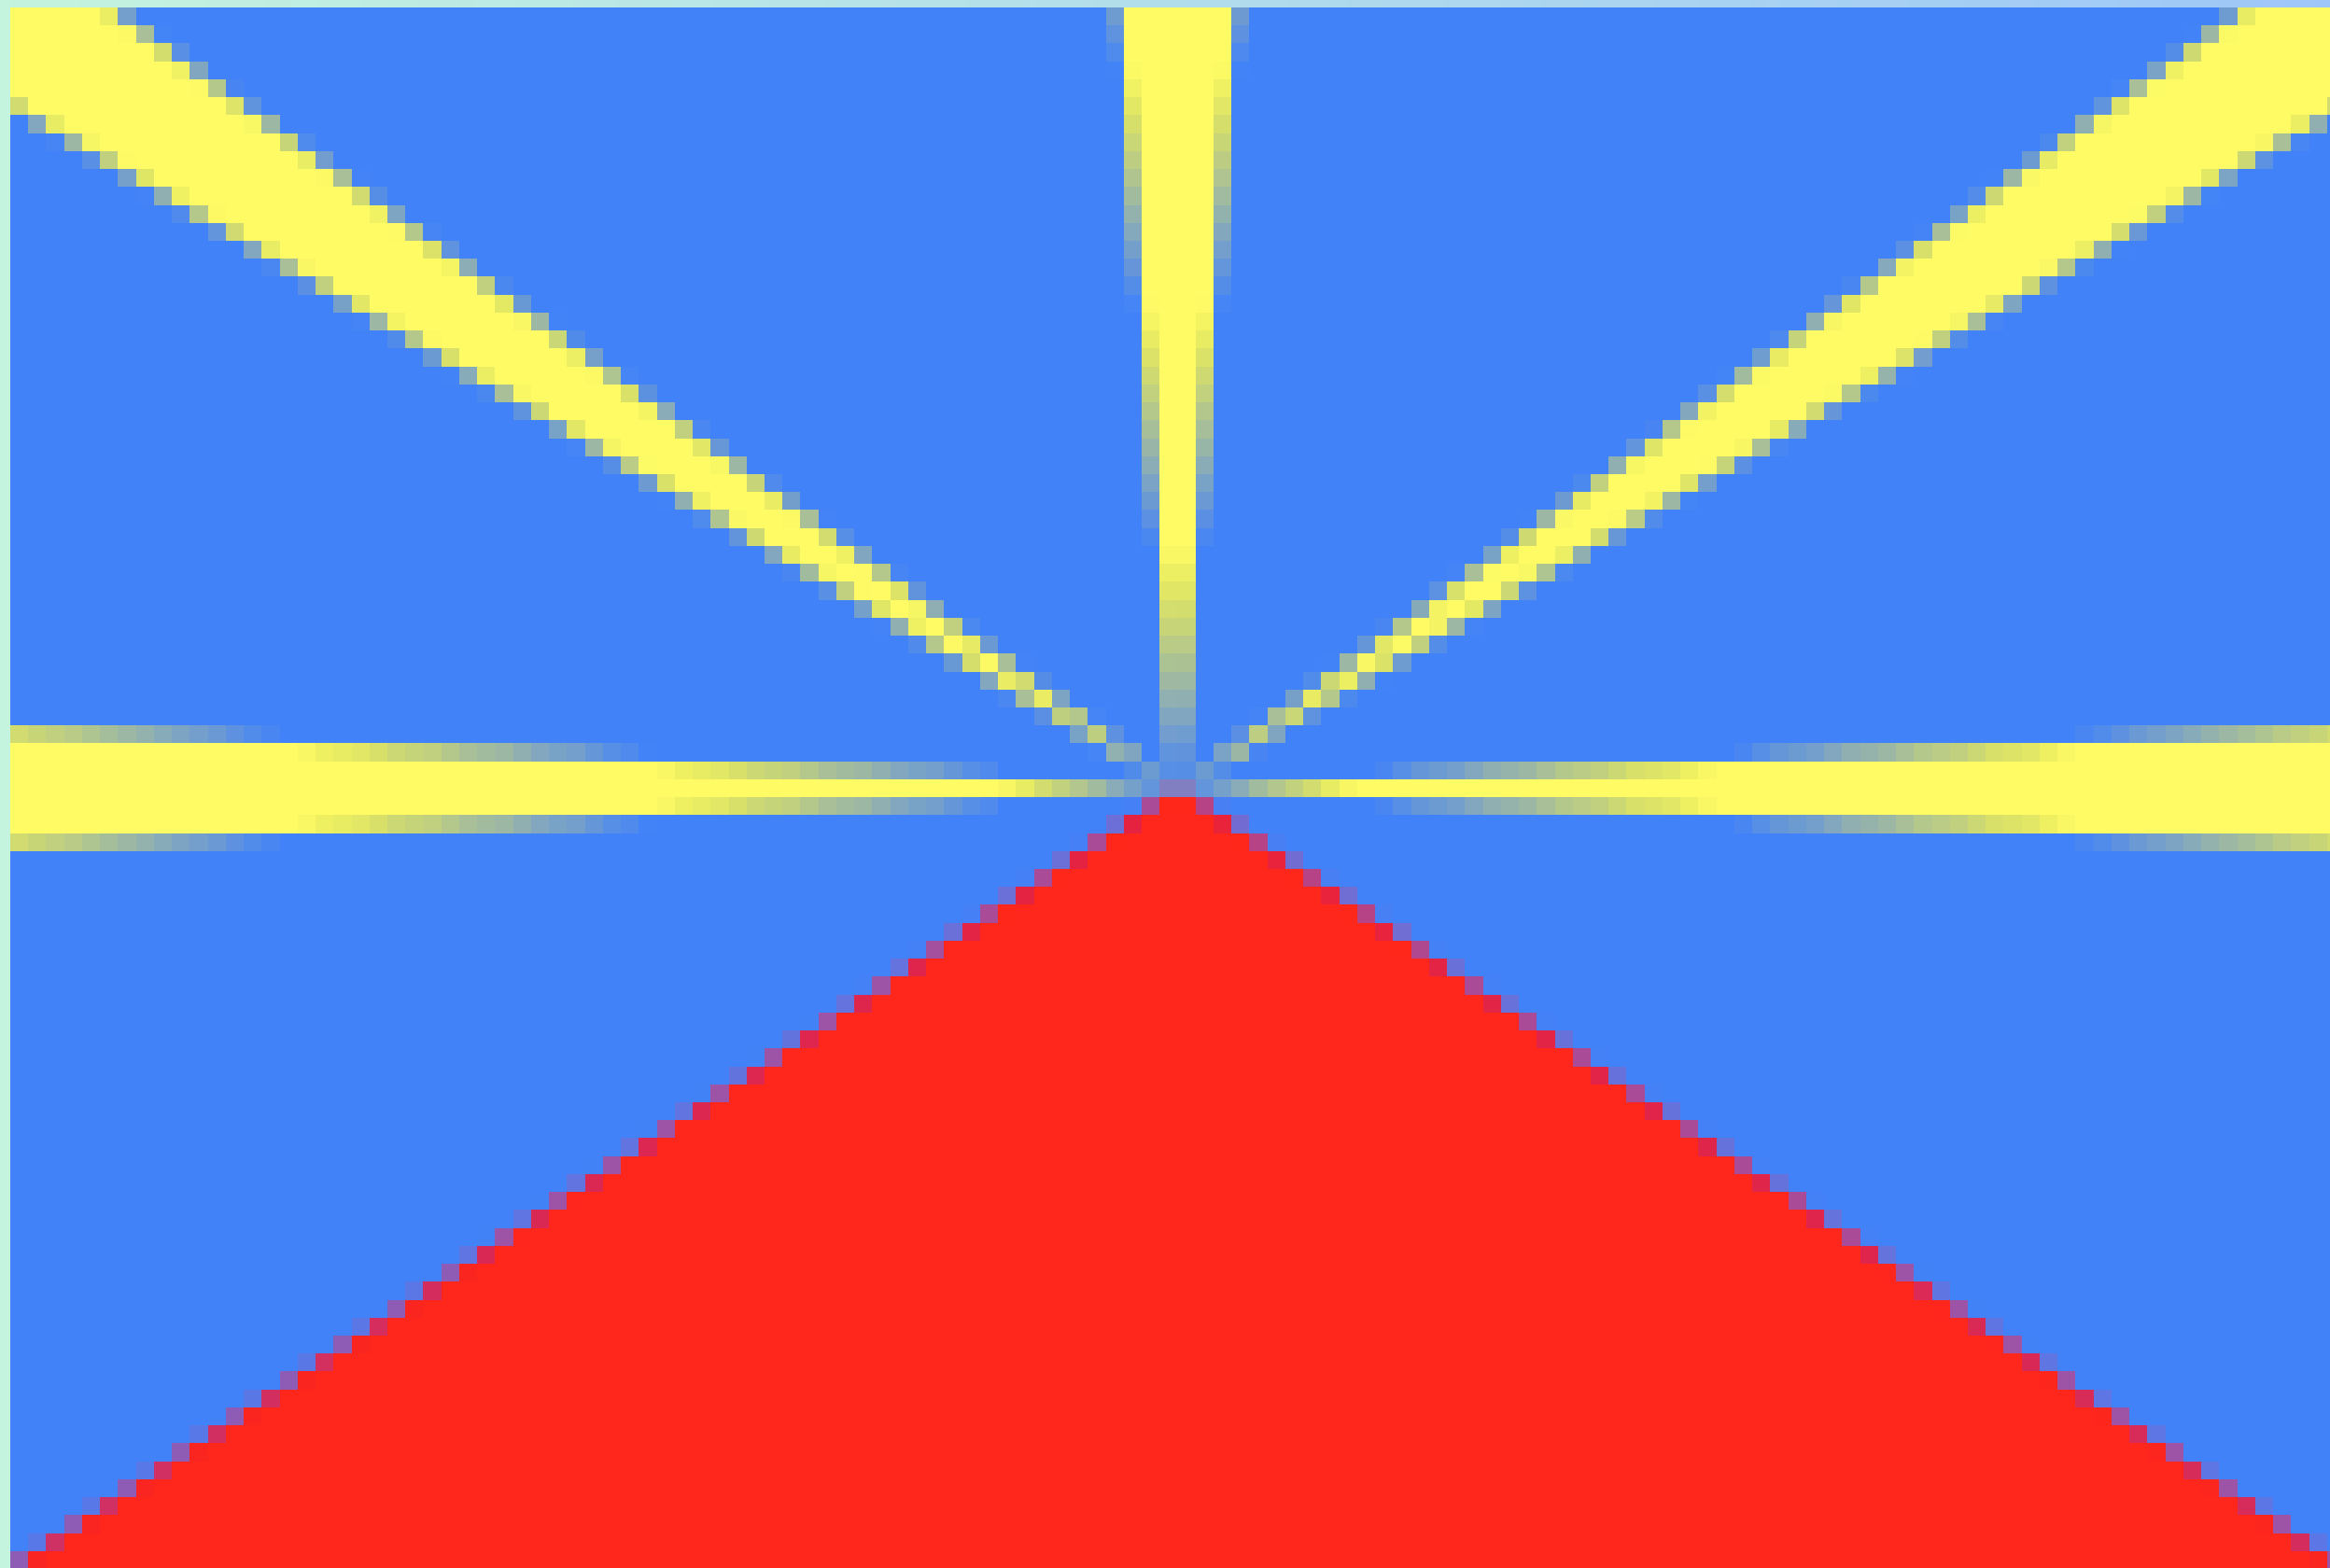

Localization

Reunion is a volcanic island in the western Indian Ocean, east of Africa, in the southern hemisphere. It is both a French overseas department and region (DROM).

With a surface area of 2,512 km², Reunion is located in the Mascareignes archipelago, 172 km west-south-west of Mauritius and 679 km east-south-east of Madagascar.

Flag of Reunion island

Geography

Relief

Reunion is a volcanic island.

The highest point is the **Piton des Neiges at an altitude of **3,070 meters**.**

****Piton de la Fournaise** (2,632 meters), located in the south-east of the island, is one of the most active volcanoes in the world.**

Piton des neiges

Piton de la Fournaise

According to the latest census, the population at 1 January 2020 was 860 000 mainly concentrated on the coasts where the main towns are located, including Saint-Denis, the capital.

The local demography is characterised by the youth of the population and their varied origins, including european, west African, east African, madagascan, indian, vietnamese, mahoran, malayan and chinese. This diversity influences Réunion's culture, which is characterised in particular by its language, Reunionese Creole, its food and its music (sega, maloya, etc)

Reunion has **24 municipalities** organised into
5 conurbation communities.
From the point of view of the European Union,
Réunion is an outermost region.

Environment and cultural heritage

Reunion has a varied fauna and flora, although locally threatened by introduced species that have become invasive. Unlike French Guiana, there are no large wild mammals (such as the jaguar or other wild animals).

However, there are many endemic species.

With the creation of the **Parc National de La Réunion**, the island was named a **UNESCO World Heritage Site** for its "Pitons, cirques and remparts" on 2 August 2010.

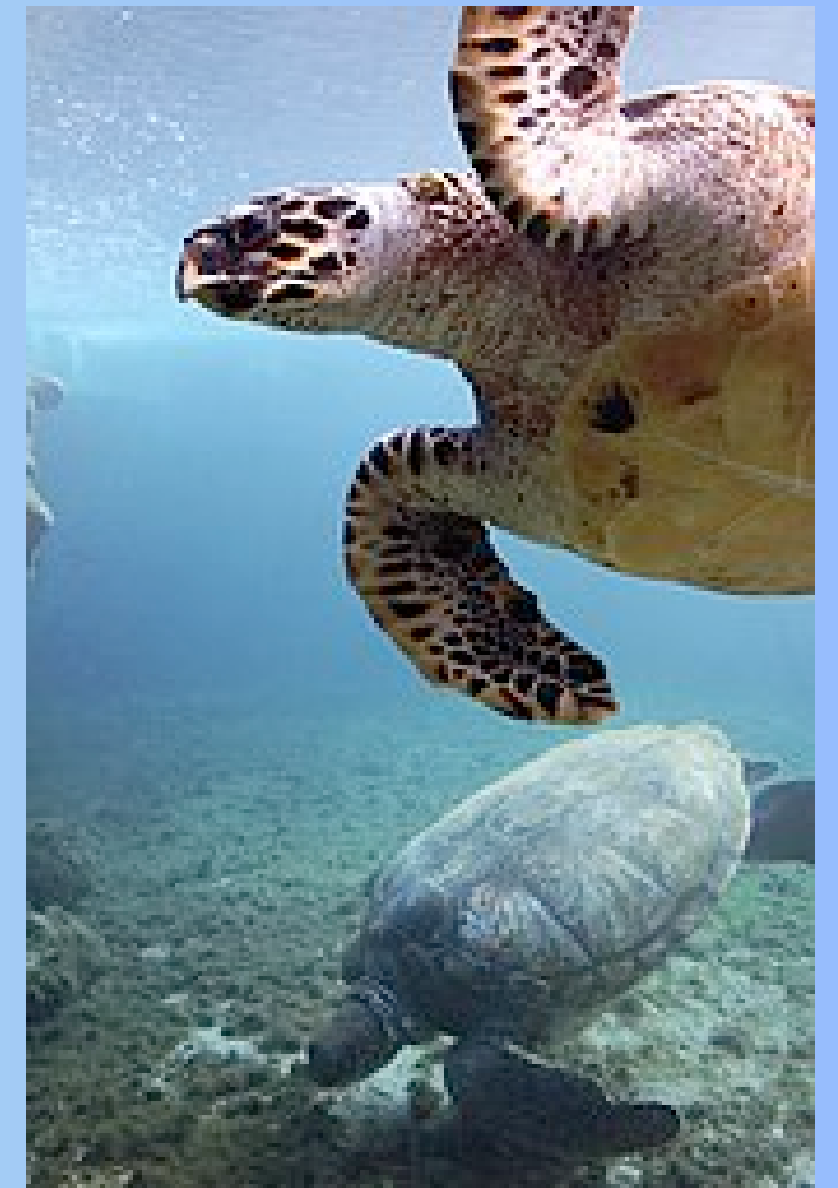

**Our school has a national park
option.**

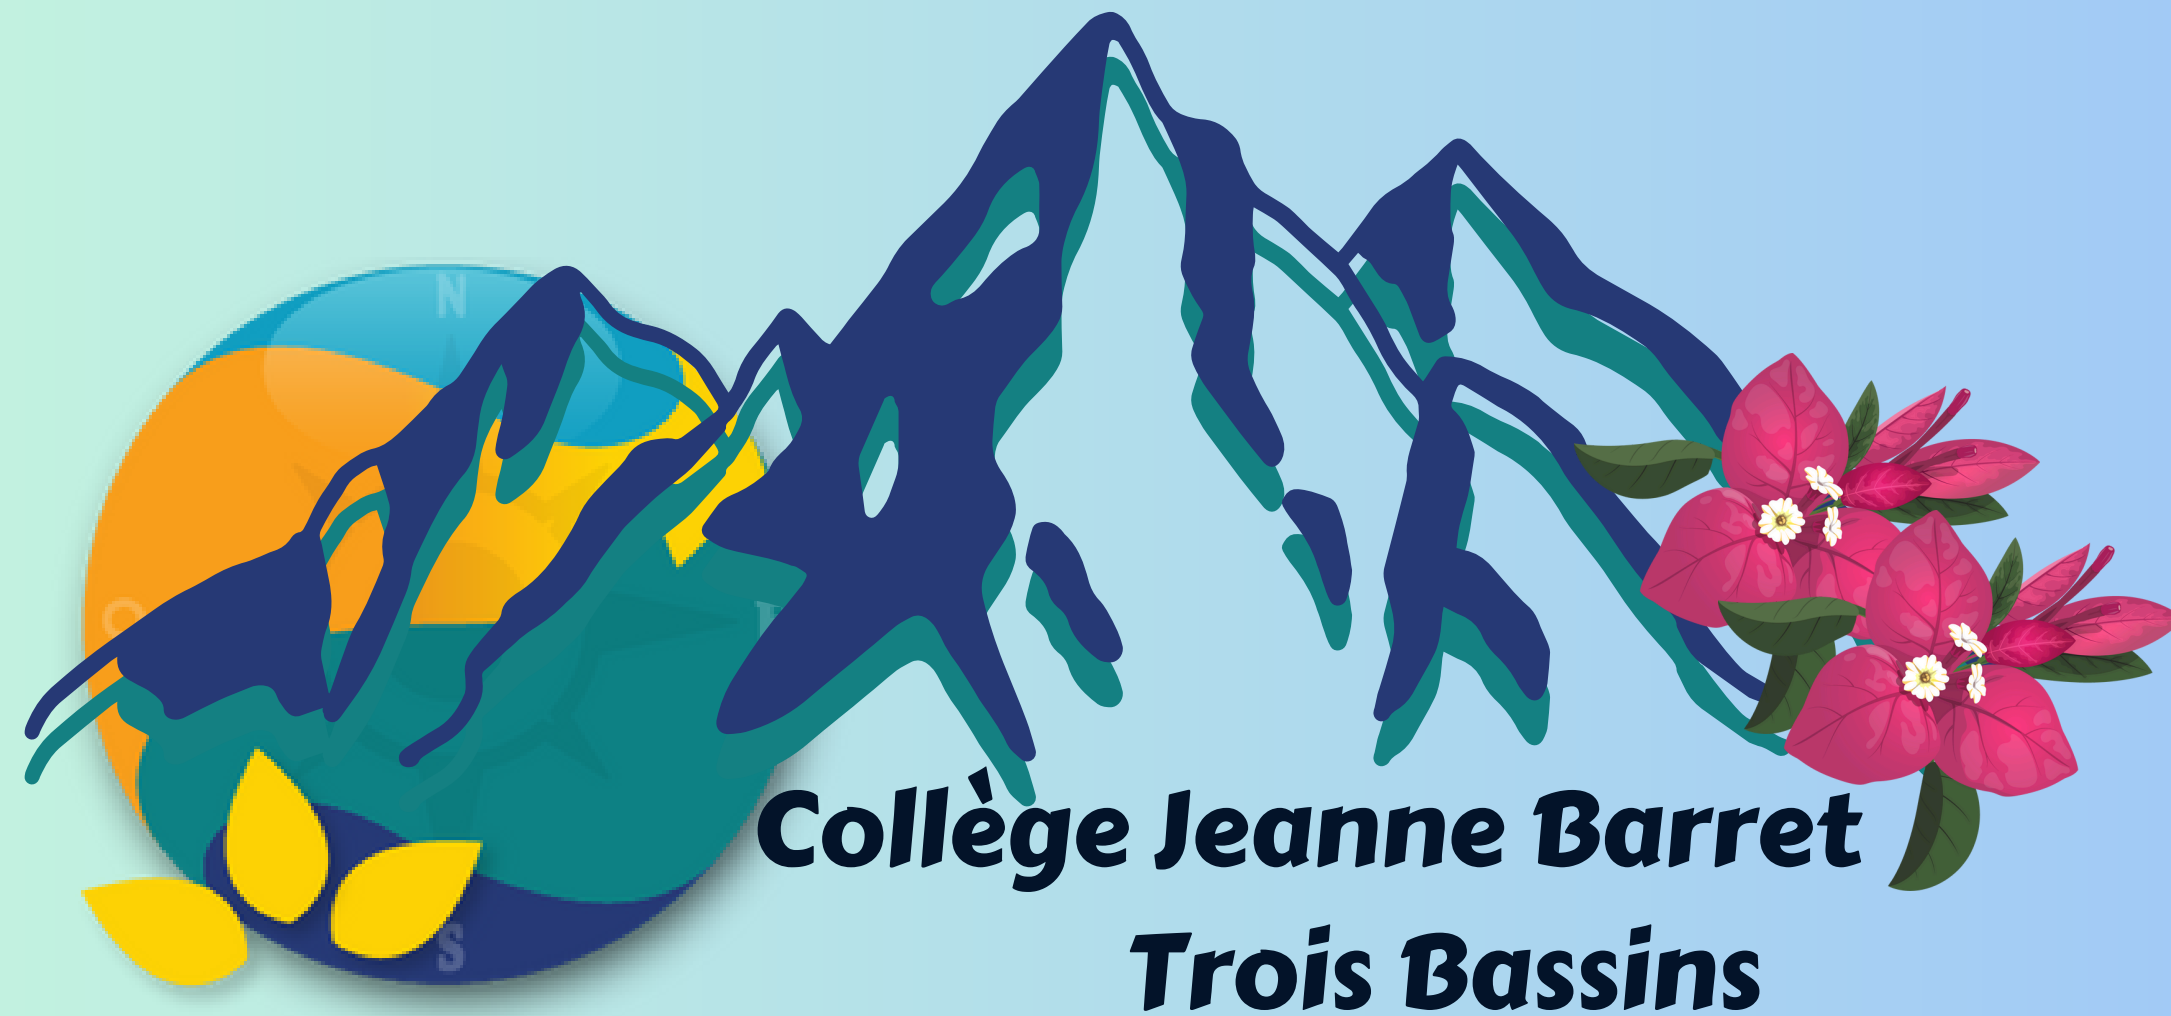

Content is no longer available

Some photos of the flora and

fauna

Our middle school

Collège Jeanne Barret
Trois Bassins

Our middle school is located in the west of the island

The middle school has around
390 pupils.

In our college there are :

4 classes of seventh (6ème)

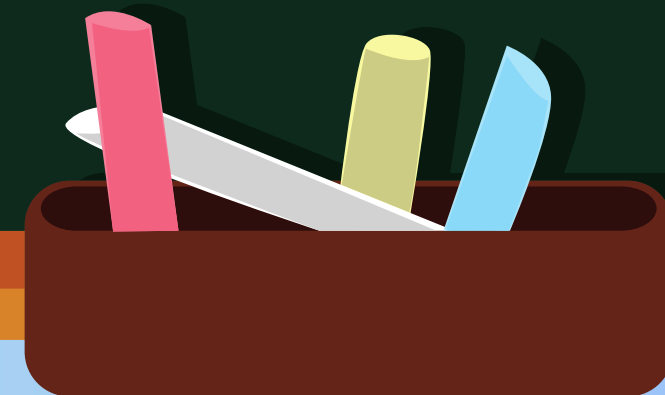

4 classes of eighth (5ème)

4 classes of ninth (4ème)

4 classes of tenth (3ème)

**The college also welcomes
disabled students to it class ULIS**

OPTIONS

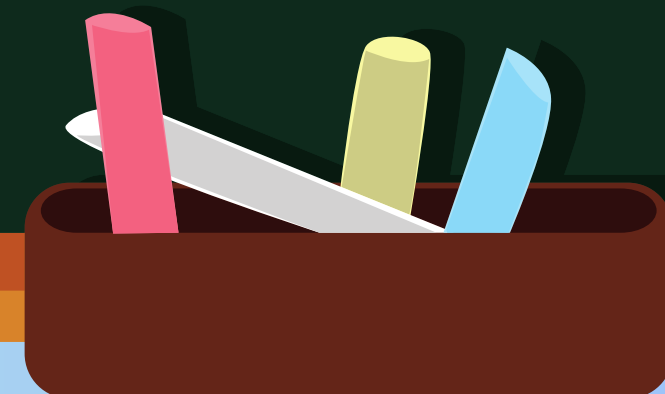

Languages: english, spanish, creole, latin
bilingual class (english/spanish)

Others: digital creation/ national park

Sports (UNSS): basketball, badminton, volley ball,
MMA, swimming

ENVIRONNEMENT

vegetable garden tended by eco-delegates

**ZERO
waste**

Measures taken in the canteen:

- participation of the eco-delegates in menu validation committees in order to take account of their tastes.
- Waste sorting.
- Food leftovers are weighed.
- Depending on the results, adjustment of the quantities ordered from the central kitchen.
- Introduction of dessert vouchers.

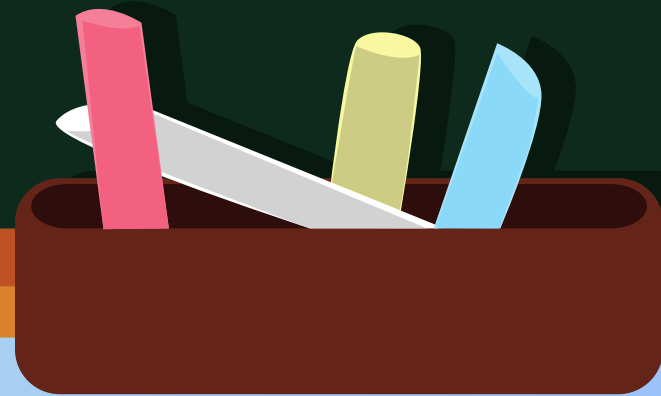

World clean up day

**56 kg of rubbish collected
around the school**

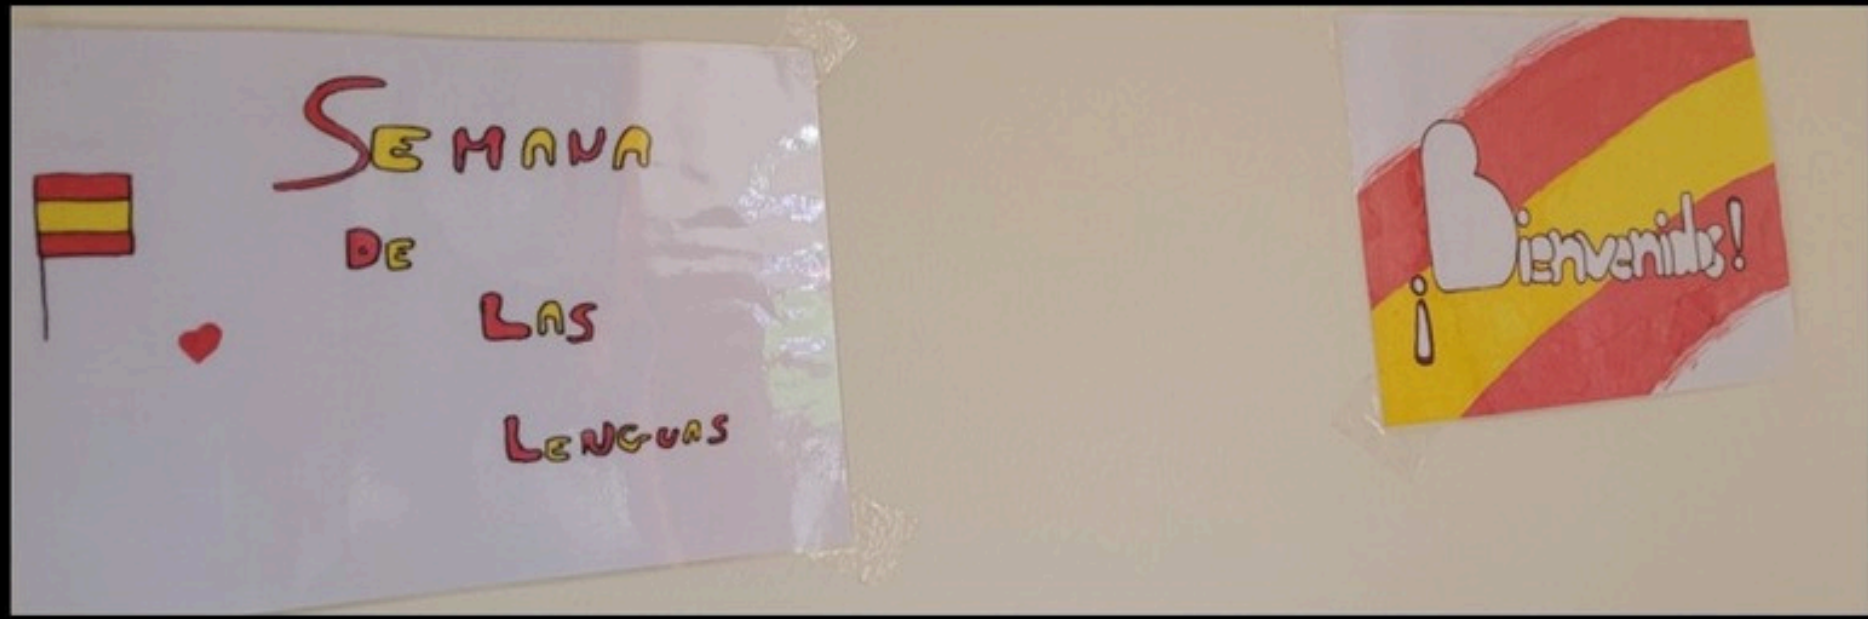

PROJECTS ACTIONS

- **School-college liaison**
- **Prevention week : prevention workshops
(harassment, addiction, health, etc.)**
- **Parents' café**
- **Educational trip (France, Spain, Hawaii, Island)**
- **Languages week**
- **Careers forum**

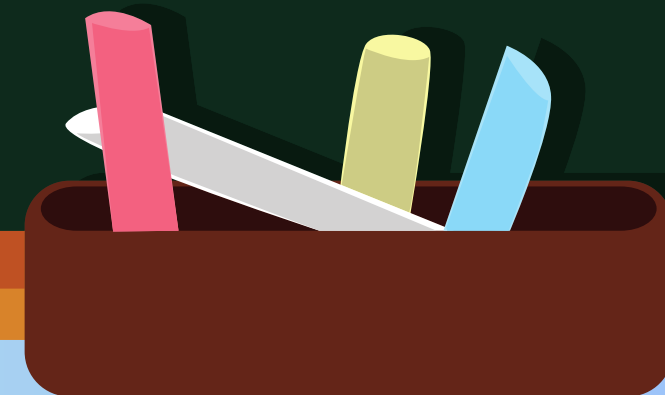

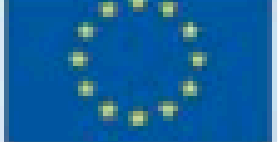

ERASMUS

The College obtained Erasmus + accreditation in February 2023.

The Erasmus project has a number of objectives:

- improve language skills in order to overcome the difficulties associated with insularity and geographical remoteness from the European continent.**
- improve the school climate through greater inclusion and welfare activities.**
 - Take a fresh look at the energy transition.**
- integrate digital technology more fully into learning**
