# "LE TAPAGE"

Roche Maigres vocational high school was approached by the town of Saint-Louis as part of the project « Fah'âme trail » at the request of Mrs Juliana M'Doihoma, mayor of the city. The trail, which runs from Saint Philippe to Le Tévelave, crosses several cities, including Saint-Louis. The project involved designing the 4 totem poles that will mark out the places along the trail that are steeped in history and cross the city. The 1st year class of the brevet des métiers d'art in cabinet making designed and built these structures: Canal des Aloès, Le Tapage, L'Observatoire des Makes and Parc des Platanes.

The totem pole in front of you, Le Tapage, was created after being selected by elected members of the town council from all the projects submitted. It provides information about the history of this area during the period of slavery, when slaves were freed to hide from the colonists.

Le Tapage is a district of Rivière Saint-Louis. It is a mountain 621 metres above sea level. It is located near the locality of La Ligne Chevalier and Ilet Furcy.

# THEIR CHOICES

The elected representatives chose this project, researched by Margot Lert . They were captivated by the design of the metal structure and the wood, which reminded them of the shape of the town of Saint-Louis.

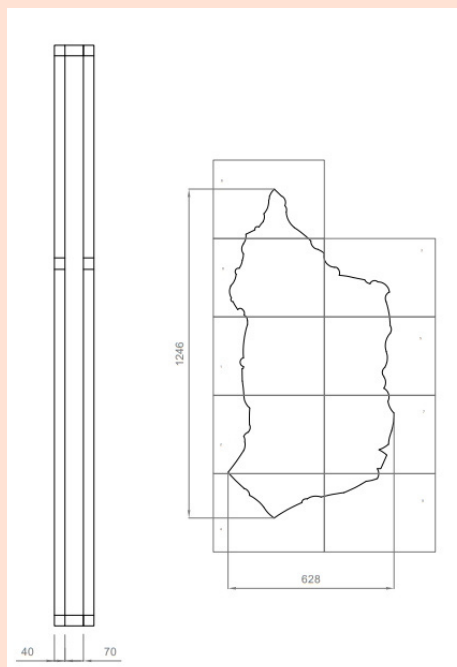

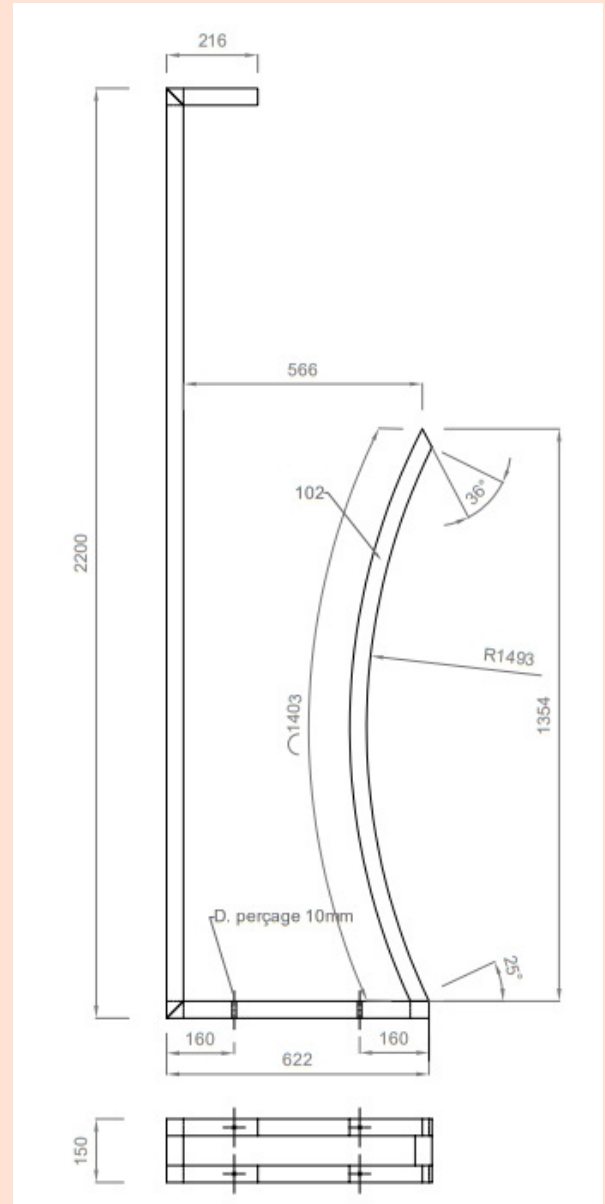

- The totem pole shows
- the route of the trail
  - the Fah'ame logo
  - the town hall logo
  - the name of the trail
  - It is supported by a metal structure

# THE PLANS

We produced plans using SKETCHUP and AUTO CAD software

<b>SENTIER FA'HAM</b>	
<b>TOTEM : Sentier Tapage</b>	
PAR : SEVERIN R. & VERBARD F.	
CLIENT : MAIRIE DE SAINT-LOUIS	
NATURE DU PLAN Squelette du Totem (sur mesure)	
SOUS-TRAITANT: Atelier Métallerie (L.P.R.M)	
Interlocuteur : M. EUPHRASIE Jahanny

Form of the  
city of  
Saint-Louis

We would like to take this opportunity to express our sincere thanks to Mrs Juliana M'Doihoma, Mayor of Saint-Louis, and her elected representatives for trusting us to carry out the FAH'AME project.

We would also like to thank our head teacher, Ms Catherine Cockedeey, for the motivation she shows in each of the students in the class.

Thanks to our supervisor, Mr Pascal TECHER, for his support throughout the project.

To the teaching staff, who made themselves available to contribute with generosity and patience, despite their professional constraints.

Not forgetting the metalwork section of the high school, for the metal framework. And last but not least, the administration, the Principal and the DDFPT, who supported this collaboration with the Saint-Louis town council, providing us with everything we needed to carry out this project successfully and to the highest standard.

Thank you all very much.
