

NETIQUETTE CHARTER

Don't use Deepfakes or AI tools to manipulate or deceive others.

Don't bully, insult or harass anyone online.

Don't be influenced by propaganda or manipulation, you have to think critically.

Don't limit others' freedom of speech just because you disagree with them.

Don't visit suspicious websites that might contain viruses or scams.

Don't share personal data (yours or someone else's).

Don't spread false information, lies or rumors.

Don't believe everything you see online, especially on social media.

Think before you post, what you write stays online forever.

Be polite and respectful to everyone online.

Check information before sharing it (avoid fake news).

Protect your personal information (address, password, phone number).

Verify pictures or videos, they might be deepfakes.

Verify the author and publication date of articles or videos.

Ask experts if you're unsure whether something is true or false.

Respect other people's opinions even if you disagree.

The Internet helps us learn, communicate, and share ideas all over the world.
But it can also spread lies, fake news and cyberbullying so we must use it responsibly.

Dangers on the Web

- Misinformation and fake news can change opinions and cause panic.
- Deepfakes make people believe in fake videos or false events.
- Propaganda can manipulate your way of thinking.
- Cyberbullying hurts others and can have serious consequences.
- Scams and hackers can steal your personal information.
- Spreading lies about people can really do a lot of damage.
- Addiction of social media can affect your health and concentration.
